# Dehancer Film plugin for Capture One

## Capture One plugin Setup Guide for Windows 2022-05-17

System Requirements (Windows)	3
Downloading and choosing the right package	4
Dehancer Film for Capture One (Windows)	6
Recommended RAW settings	11
Application path and user data location	12

---

## System Requirements (Windows)

### Hardware requirements:

- PC with Nvidia or AMD GPU
- OpenCL compatible GPU
- GPU drivers properly installed and up to date

### Software compatibility:

- Windows 10 64 bit (genuine licensed installation is required)
- Any current version of Capture One that supports external editing

**Note:** Plugin operation with hacked or modified host applications and OS is not guaranteed.

### Known issue: Unicode symbols (e.g., Cyrillic) in system paths

Dehancer may not work properly in Windows 10 if system paths contain **Unicode characters (e.g., Cyrillic)**. To solve the issue, follow these steps:

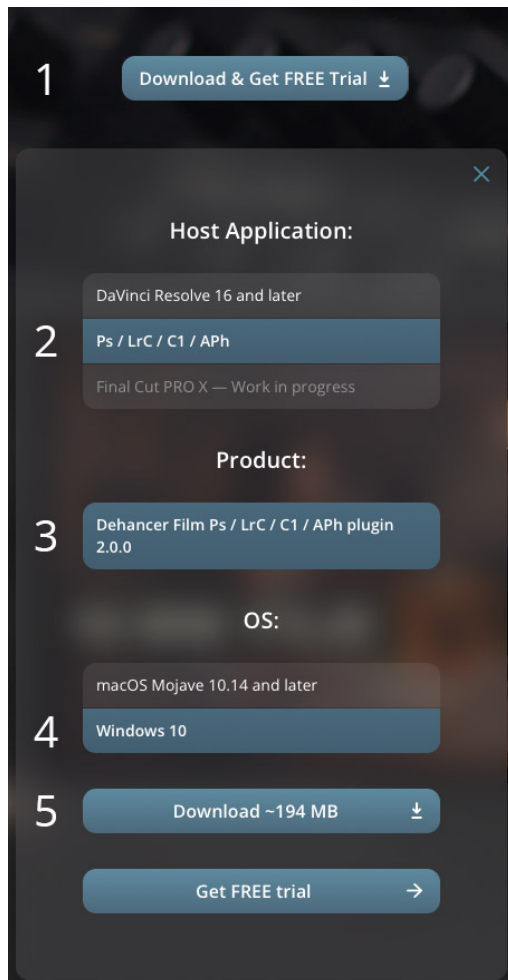

1. Sign in as **Administrator**
2. Open the **Start** menu and click the **Settings** 'gear' icon.
3. Click the **Time & Language** → **Language** on the left side.
4. Click on the **Administrative language settings** link on the right side.
5. Select the **Administrative** tab and click the **Change system locale** button.

Depending on the Windows version, this setting may be found in an alternate location, for example: Start → Settings → Time & Language → Date, time, & regional formatting → Additional date, time, & region settings → Region → Administrative → Change system locale

6. Enable the checkbox **BETA: Use Unicode UTF-8 for worldwide language support** and restart your computer.

## Downloading and choosing the right package

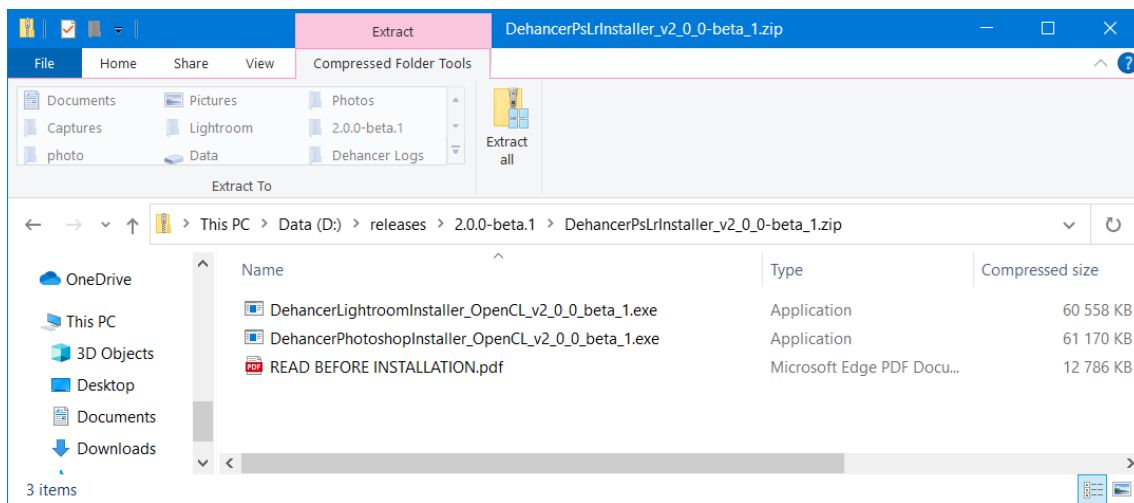

1. Make sure that your computer meets the **system requirements** for the plugin to work correctly.
2. Download the latest version of the plugin from **www.dehancer.com**

1. Press the button **Download and Get FREE Trial**.
2. Select **Ps / LrC / C1 / APh** as the Host Application.
3. Select **Dehancer Film Ps / LrC / C1 / APh plugin** as the Product.
4. Check the **Operating System** selection.
5. Hit **Download** button.  
Your download will start automatically.

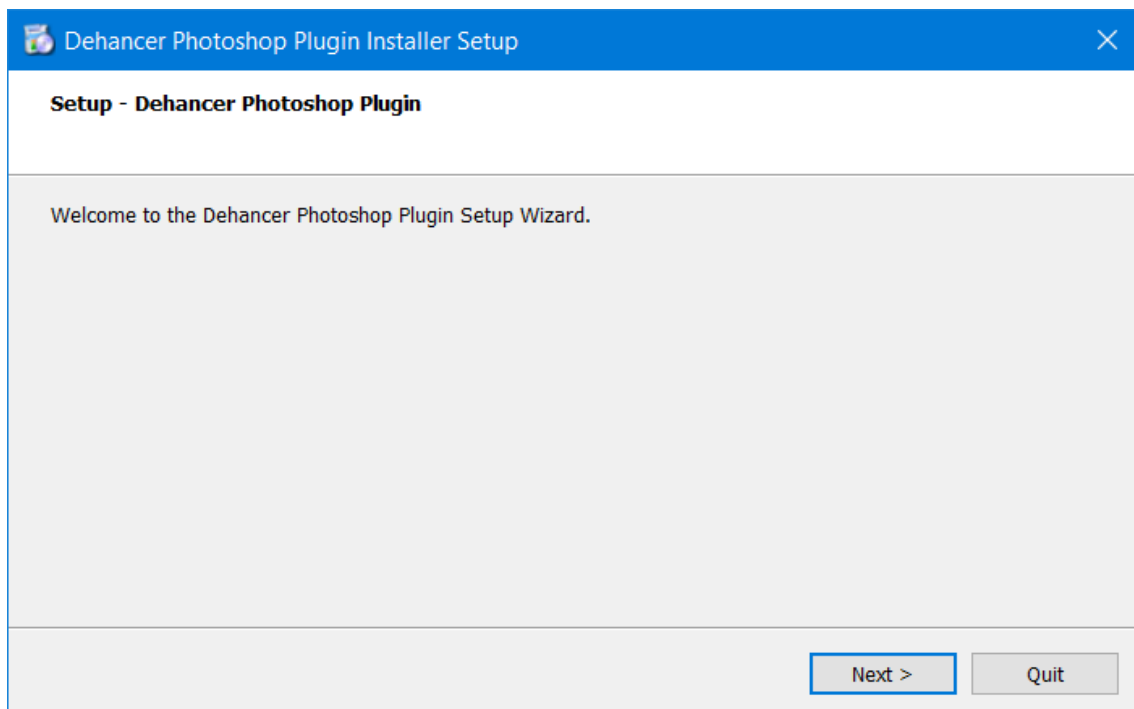

3. Unzip the downloaded zip file, if your system didn't do it automatically:

## ATTENTION!

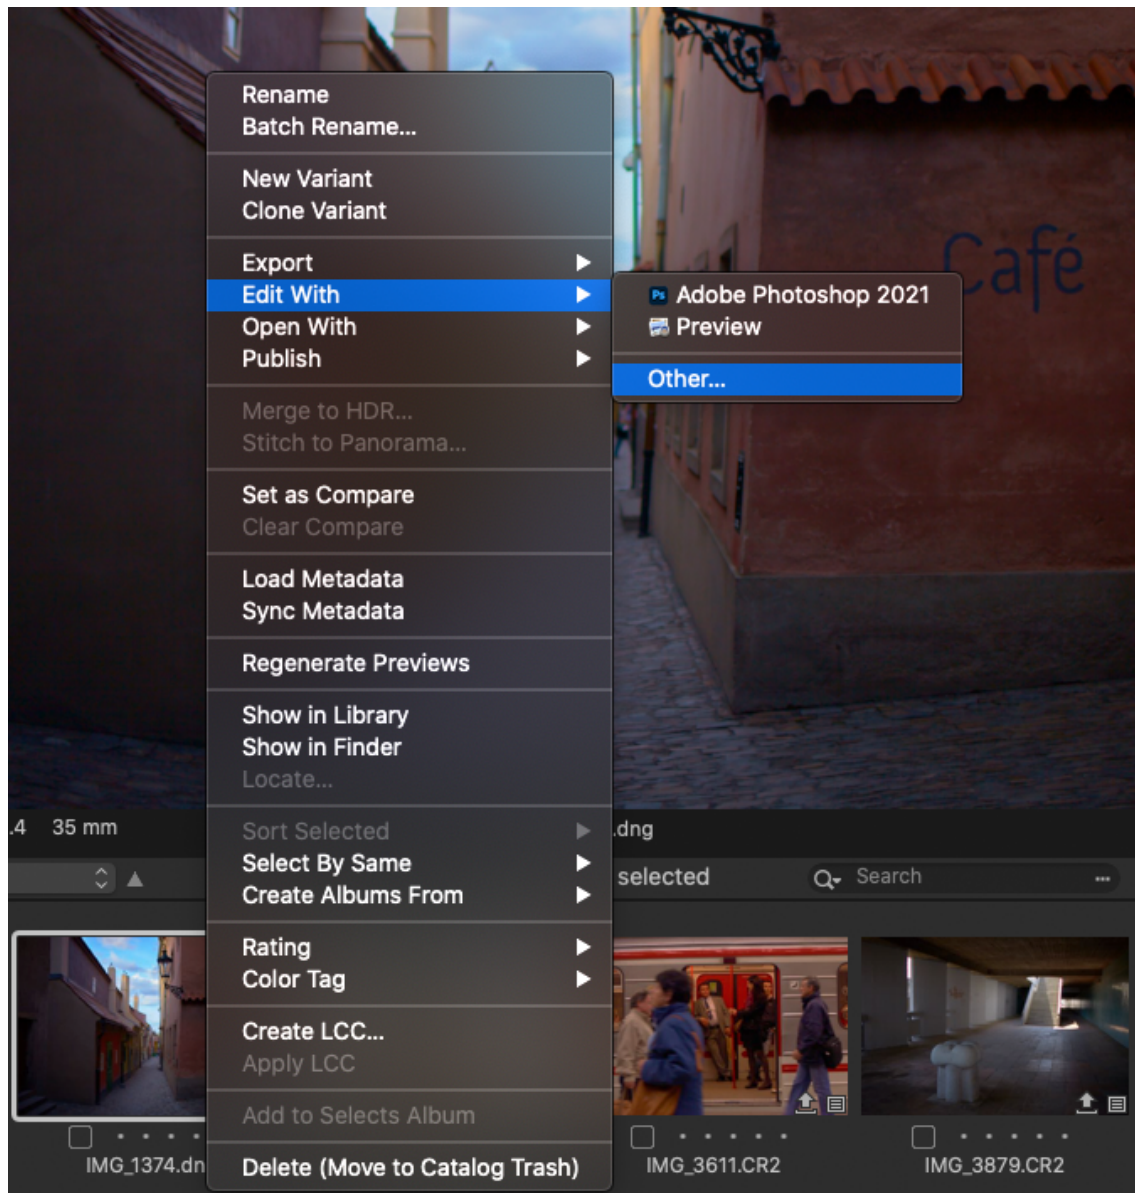

The Lightroom plugin is used for Capture One installation

4. Run the **Lightroom** installation file and follow the installation steps.

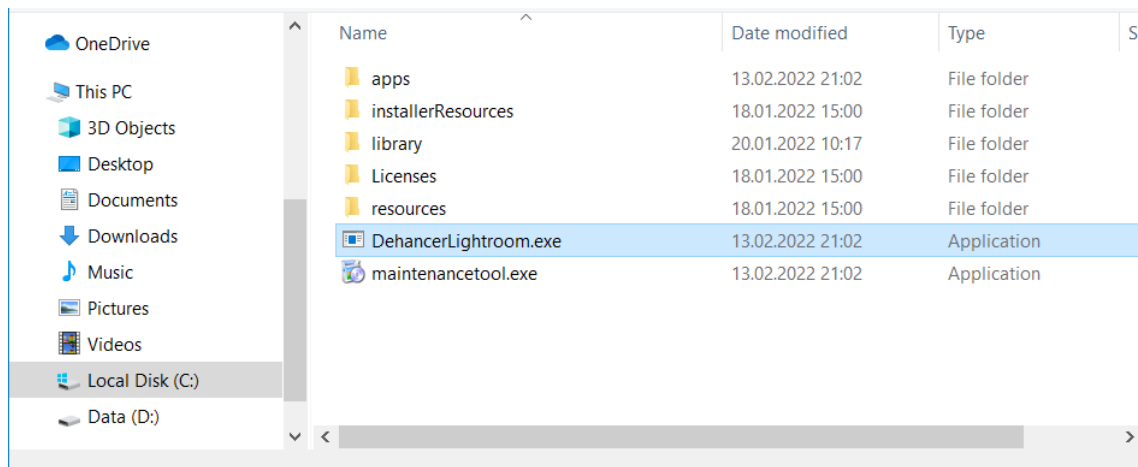

## Dehancer Film for Capture One (Windows)

5. Launch Capture One. If the program was already running, you don't need to restart it.
6. Right Click on any photo in your Catalog and select **Edit With → Other...**

7. Specify the path to the installed Dehancer plugin:

**C:\Program Files\Dehancer Lightroom Plugin\DehancerLightroom.exe**

Now **Dehancer Lightroom Plugin** will appear in the external editors list.

Note that your file must be presented in the **sRGB color space** to be displayed and processed properly. Support for other color spaces will be added later.

[Recommended Color Settings for Dehancer Ps/LrC](#)

9. In the following dialogue, select the appropriate options:

- TIFF 16 bit
- sRGB Color Space Profile

Hit the **Edit Variants** button, then the plugin will open.

10. At first launch, the **Settings** window will open automatically. You can also open the Settings at any time by clicking on the gear icon in the toolbar.

11. Use the button **Update Film Profiles** to download the profiles the first time.

12. Now Dehancer is ready to use.

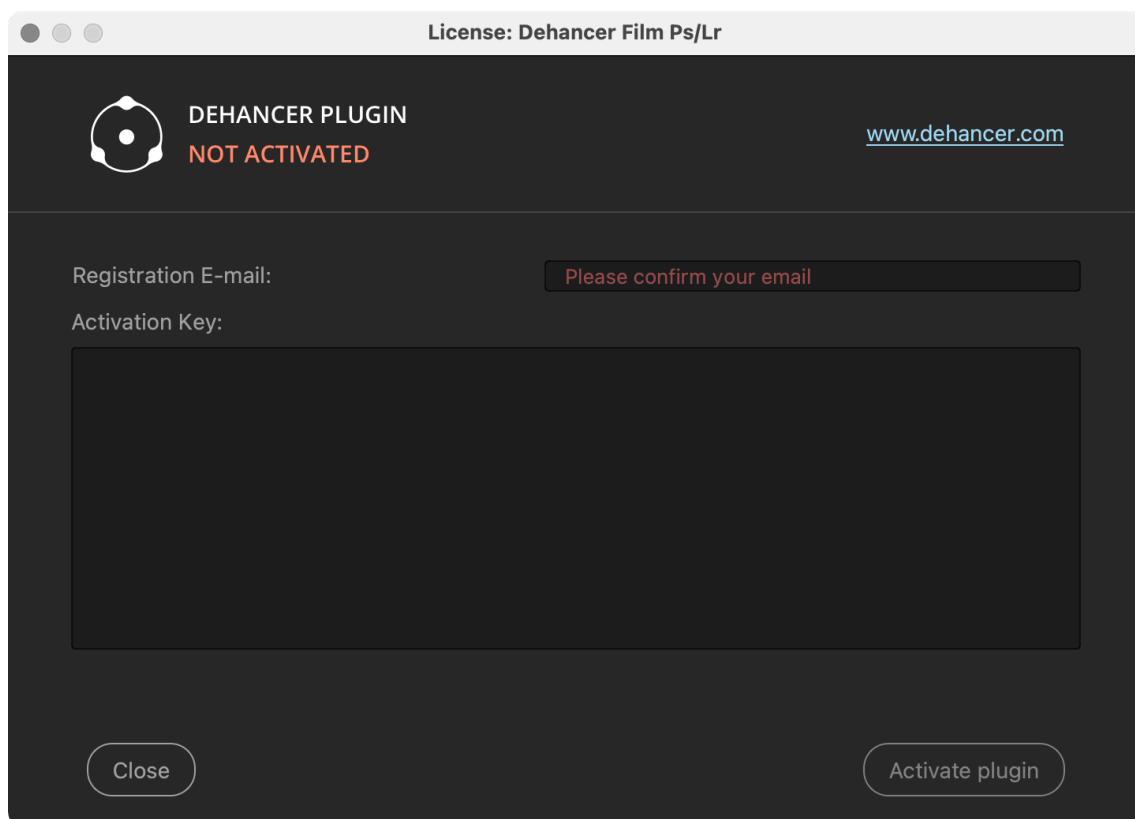

13. To remove the watermark, buy the License or **get the free 2-week trial on our website.** The License will be automatically sent to your account email and displayed in your User Profile as well.

Each License contains Activation Keys for two workstations (seats). Each Key activates both plugins – Adobe Photoshop and Adobe Lightroom.

14. Launch the Activation widget.

15. Enter your email and Activation Key, then press the **Activate plugin** button.

16. Enjoy!

---

## Recommended RAW settings

**While processing RAW photos in Capture One, we recommend:**

- Correct the most severe deviations in exposure and white balance
- Use the **Linear profile** (contrast curve) if possible, avoiding clipping in shadows and highlights
- Disable noise reduction and sharpening
- Avoid any local enhancements which might cause visible halos
- Export files in **sRGB TIFF 16 bit** format

---

## Application path and user data location

Below you can find the main system paths of the installed application components and user data locations, which you may need when contacting support or maintaining the plug-in.

### Installation (Windows)

**Adobe Photoshop and Affinity Photo plugin:**

C:\Program Files\Common Files\Adobe\Plug-Ins\CC\Dehancer

**Adobe Lightroom and Capture One plugin:**

C:\Program Files\Dehancer Lightroom Plugin\Dehancer Lightroom.exe

### User Data (Windows)

**Shared folder:**

C:\Users\{user}\AppData\Local\dehancer\com.dehancer.film\_shared

**User Presets folder:**

C:\Users\{user}\AppData\Local\dehancer\com.dehancer.film\_shared/presets

**Adobe Photoshop and Affinity Photo plugin log:**

C:\Users\{user}\AppData\Local\dehancer\com.dehancer.film\_shared/  
dehancer\_logs/photoshop\_plugin.log

**Adobe Lightroom and Capture One plugin log:**

C:\Users\{user}\AppData\Local\dehancer\com.dehancer.film\_shared/  
dehancer\_logs/lightroom\_plugin.log
